# 19 " EMPTY PATCH PANEL

Product Description :

24 Port Empty Patch Panel
Operation temperature:-40°C to 60°
C, Relative humidity:85%(30°C), Air
pressure:70-106Kpa
19"/1RU patch panel with cable
management
Suitable for keystone modules
black, RAL 9005 and metal type
Housing material : ABS or , UL94-
V0 or UL94-V2
Labelling fields:1-2 with dust cover

19" Cat6 utp patch panel

19" Cat6a utp patch panel

Features :

Front Panel: 1.5mm thickmness metal   panel(SPCC),
painting on surface
Metallic Frame: 1.5mm thickness
Support Bar:Cold Rolling
Fit the keystone jack
High reliability and superior performance
applied keystone jack Cat6/Cat6a/Cat7
cable organizer

B&C Fiber Group duplex patch leads are manufactured in our own modern facilities from the highest quality optical fiber, terminated with ceramic ferrule connectors of various types. Cable preparation, termination and performance testing is carried out to strictly managed procedures, with high focus on quality control.
All B&C Fiber optical products are 100% optical tested and come with a test certificate. Our products are conform with all industry typical standards: **IEC, EIA, TIA or Telcordia**
